

March 12, 2012

Dear Valued Client,

Unfortunately, we are no longer keeping updated copies of MSDS sheets.

We have consulted with the Centre for Occupational Health and Safety (CCOHS), they state that manufactured items do not require MSDS sheets as they will not release hazardous substances while being used as intended, under normal conditions of use.

Moving forward we will no longer be providing MSDS sheets. If we have them on file and are up-to-date I am sure we could send them, but as soon as they are outdated we do not plan to update them.

I hope you understand.

If you have any questions, please let me know.

Yours truly,

DIXON TICONDEROGA INC.
