**Section 1 - PRODUCT AND COMPANY IDENTIFICATION**

**Manufacturer Information**
KOPPERS INC.
436 Seventh Avenue
Pittsburgh, PA 15219-1800
Mfg Contact: 412-227-2001 (SDS Requests: 866-852-5239)

**Product Identifier:** CREOSOTE PRESSURE TREATED WOOD

**Product Use**
Industrial wood products; specifically railroad ties, utility poles, and marine pilings. Creosote treated wood is intended for exterior/outdoor uses and only those applications approved by the American Wood Protection Association (AWPA) Use Category System as set forth in the most current edition of the AWPA Book of Standards.

**Section 2 - HAZARDS IDENTIFICATION**

**EMERGENCY OVERVIEW**
- **Physical Form:** Pressure treated poles and crossties - treated at a retention level of 7-9 lbs/ft³, with a wood density of 45-55 lbs/ft³. Pressure treated piling - treated at a retention level of 12-20 lbs/ft³, with a wood density of 45 lbs/ft³. Actual retention level dependent on wood stock, moisture levels, and customer specifications.
- **Color:** dark, brown to black
- **Odor:** tar odor
- **Signal Word:** WARNING!

**Major Health Hazards:** harmful if inhaled, harmful on contact with the skin, respiratory tract irritation, skin irritation, eye irritation, allergic reactions, nasal/sinus cancer, lung cancer, skin cancer

**Physical Hazards:** Dust/air mixtures may ignite or explode.

**Precautionary Statements:** Avoid breathing dust. Avoid contact with eyes, skin and clothing. Use only with adequate ventilation. Wash thoroughly after handling. Protective clothing must be changed when it shows signs of contamination. Observe good hygiene and safety practices when handling this product. Do not use this product until the MSDS has been read and understood. For more information, please see Consumer Information Sheet for this product.

**POTENTIAL HEALTH EFFECTS**

**Inhalation**
- **Short Term:** Creosote may cause irritation. Wood dust may cause irritation and allergic reactions.
- **Long Term:** Creosote may cause nausea, vomiting, and headache. Wood dust may cause irritation, allergic reactions, nosebleed, nausea, vomiting, loss of appetite, chest pain, difficulty breathing, headache, drowsiness, dilated pupils, visual disturbances, irregular heartbeat, lung damage, liver damage, kidney damage, and nasal/sinus cancer.

**Skin**
- **Short Term:** Creosote may cause irritation, skin discoloration, skin disorders, sensitivity to sunlight, changes in body temperature, nausea, vomiting, headache, difficulty breathing, irregular heartbeat, bluish skin color, and convulsions. Wood dust may cause irritation, allergic reactions, skin disorders, difficulty breathing, irregular heartbeat, headache, visual disturbances and kidney damage.

**Component Related Regulatory Information**

This product may be regulated, have exposure limits or other information identified as the following: Wood dust, all soft and hard woods, Wood dusts-hard wood, Wood dusts (all other wood dusts), Wood dusts (birch, mahogany, teak, walnut), Wood dust, western red cedar, Creosotes.

**Section 4 - FIRST AID MEASURES**

**Inhalation**

If adverse effects occur, remove to uncontaminated area. Give artificial respiration if not breathing. Get immediate medical attention.

**Skin**

Wash skin with soap and water for at least 15 minutes while removing contaminated clothing and shoes. DO NOT rub until skin is free of sawdust and preservative material. Get medical attention, if needed. Thoroughly clean and dry contaminated clothing and shoes before reuse.

**Eyes**

Flush eyes with plenty of water for at least 15 minutes. DO NOT rub eyes. Then get immediate medical attention.

**Ingestion**

If a large amount is swallowed, get medical attention.

**Section 5 - FIRE FIGHTING MEASURES**

See Section 9 for Flammability Properties

**NFPA Ratings:**

- **Health:** 2
- **Fire:** 1
- **Reactivity:** 0

**Hazard Scale:**

- 0 = Minimal
- 1 = Slight
- 2 = Moderate
- 3 = Serious
- 4 = Severe
Flammable Properties
Dust/air mixtures may ignite or explode. During fire conditions, vapors and decomposition products may be released, forming flammable/explosive mixtures in air. Contact with heat may generate toxic and/or flammable gases.

Sensitivity to Mechanical Impact
Not available

Sensitivity to Static Discharge
Not available

Extinguishing Media
- carbon dioxide, regular dry chemical, regular foam, water spray

Protective Equipment and Precautions for Firefighters
- Full fire fighting turn-out gear (bunker gear).

Fire Fighting Measures
Avoid inhalation of material or combustion by-products. Stay upwind and keep out of low areas. Use extinguishing agents appropriate for surrounding fire.

*** Section 6 - ACCIDENTAL RELEASE MEASURES ***

Water Release
Subject to California Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65).

Occupational Spill / Release
- Collect debris and used material in appropriate container for disposal. Due to the concentration of Creosote and the CERCLA (40 CFR 302.4) reportable quantity of 1 pound, the release of 6 pounds of this product requires National Response Center notification.

*** Section 7 - HANDLING AND STORAGE ***

Handling Procedures
- Use methods to minimize dust. Avoid frequent or prolonged inhalation of sawdust from treated wood. When sawing and machining treated wood, wear a dust mask. When power-sawing and machining, wear goggles to protect eyes from flying particles. Whenever possible, these operations should be performed outdoors to avoid indoor accumulations of airborne sawdust from treated wood. Avoid frequent or prolonged skin contact with creosote-treated wood; when handling the treated wood, wear long-sleeved shirts and long pants and use gloves impervious to the chemicals (for example, gloves that are vinyl-coated). Use protective skin cream on exposed skin before and during work shift. To reduce sun sensitivity a sun-blocking lotion (SPF 15+) can also be applied prior to application of a protective cream. After working with the wood, and before eating, drinking and use of tobacco products, wash exposed areas thoroughly. If oily preservative or sawdust accumulate on clothes, launder before reuse. Wash work clothes separately from other household clothing.

Storage Procedures
- No special requirements.
Exposure Guidelines

Creosote is a complex mixture of variable composition, and while no odor threshold for creosote has been established, work done at the University of California has measured the odor thresholds for one of the more volatile components in creosote and determined that the involved odor threshold is in the part per billion range, and well below applicable exposure limits. On the basis of these data the perception of creosote odor in and of itself should not be taken as an indication of exposure in excess of accepted exposure limits. Exposure to wood dust would not be expected under normal use conditions. If handling or use patterns associated with creosote treated wood involve the use of a power saw, sander, drill or any tool or activity resulting in the generation of airborne particulate the following wood dust exposure limits should be observed and appropriate steps taken to minimize exposure.

Component Exposure Limits

WOOD DUST, HARDWOODS (Not Available)

- ACGIH: 1 mg/m³ TWA (inhalable fraction, related to Wood dusts (all other wood dusts))
- NIOSH: 1 mg/m³ TWA (related to Wood dust, all soft and hard woods)
- Mexico: 1 mg/m³ TWA LMPE-PPT (related to Wood dusts-hard wood)

WOOD DUST, SOFTWOODS (Not Available)

- ACGIH: 0.5 mg/m³ TWA (inhalable fraction, related to Wood dust, western red cedar) dermal sensitizer;respiratory sensitizer (related to Wood dust, western red cedar)
- NIOSH: 1 mg/m³ TWA (related to Wood dust, all soft and hard woods)

COAL TAR PITCH VOLATILES (65996-93-2)

- OSHA (US): 0.2 mg/m³ TWA (benzene soluble fraction)
- ACGIH: 0.2 mg/m³ TWA (as benzene soluble aerosol)
- NIOSH: 0.1 mg/m³ TWA (Cyclohexane-extractable fraction)
- Mexico: 0.002 mg/m³ TWA LMPE-PPT; 0.02 mg/m³ TWA LMPE-PPT (as Particulate polycyclic aromatic hydrocarbons)

Ventilation

Ensure adequate ventilation. Ensure compliance with applicable exposure limits.

PERSONAL PROTECTIVE EQUIPMENT

Eyes / Face

ANSI Z87.1-1989 approved safety glasses with side shields.

Protective Clothing

Wear tightly woven long-sleeved shirts and long pants. Remove and launder contaminated clothing separately from other laundry before reuse.

Glove Recommendations

Individuals must wear gloves impervious to the wood treatment formulations in all situations where dermal contact with creosote is expected.

Protective Material Types

Examples of impervious materials for protective clothing (e.g. overalls, jackets, gloves and boots) required during application and handling of creosote are polyvinyl acetate (PVA), polyvinyl chloride (PVC), Neoprene and NBR (Buna-N).

Respiratory Protection

If the applicable TLVs and/or PELs are exceeded, use canister or cartridge respirators, which are MSHA/NIOSH-approved, with high-efficiency particulate filters.

### **Section 10 - STABILITY AND REACTIVITY**

**Chemical Stability**

Stable at normal temperatures and pressure.

**Conditions to Avoid**

Avoid heat, flames, sparks and other sources of ignition. Avoid contact with incompatible materials.

**Materials to Avoid (Incompatibilities)**

oxidizing materials, acids

**Decomposition Products**

carbon monoxide, carbon dioxide, oxides of nitrogen

**Possibility of Hazardous Reactions**

Will not polymerize.

### **Section 11 - TOXICOLOGICAL INFORMATION**

**Irritation / Corrosive Information**

**RTECS Irritation**

The components of this material have been reviewed and RTECS publishes no applicable data as of the date on this document.
Local Effects

WOOD DUST, HARDWOODS (Not Available)
Irritant: inhalation, skin, eye

WOOD DUST, SOFTWOODS (Not Available)
Irritant: inhalation, skin, eye

COAL TAR CREOSOTE (8001-58-9)
Irritant: inhalation, skin, eye

Acute and Chronic Toxicity

Component Analysis - LD50/LC50

The components of this material have been reviewed in various sources and the following selected endpoints are published:

COAL TAR CREOSOTE (8001-58-9)
Oral LD50 Rat 2524 mg/kg

RTECS Acute Toxicity (selected)

The components of this material have been reviewed, and RTECS publishes the following endpoints:

COAL TAR CREOSOTE (8001-58-9)
Oral: 725 mg/kg Oral Rat LD50

Acute Toxicity Level

COAL TAR CREOSOTE (8001-58-9)
Moderately Toxic: ingestion

Carcinogenicity (Product)

OSHA: No NTP: Yes IARC: Yes (See below for additional information on component carcinogen status)

Component Carcinogenicity

WOOD DUST, HARDWOODS (Not Available)
ACGIH: A1 - Confirmed Human Carcinogen (related to Wood dusts-hard wood)
NIOSH: potential occupational carcinogen (related to Wood dust, all soft and hard woods)
NTP: Known Human Carcinogen (Select Carcinogen, related to Wood dust, all soft and hard woods)
IARC: Monograph 100C [2012]; Monograph 62 [1995] (Group 1 (carcinogenic to humans), related to Wood dust, all soft and hard woods)

WOOD DUST, SOFTWOODS (Not Available)
ACGIH: A4 - Not Classifiable as a Human Carcinogen (related to Wood dust, western red cedar)
NIOSH: potential occupational carcinogen (related to Wood dust, all soft and hard woods)
NTP: Known Human Carcinogen (Select Carcinogen, related to Wood dust, all soft and hard woods)
IARC: Monograph 100C [2012]; Monograph 62 [1995] (Group 1 (carcinogenic to humans), related to Wood dust, all soft and hard woods)

COAL TAR CREOSOTE (8001-58-9)
NIOSH: potential occupational carcinogen
IARC: Monograph 92 [2010]; Supplement 7 [1987]; Monograph 35 [1985] (Group 2A (probably carcinogenic to humans))

RTECS Tumorigenic

The components of this material have been reviewed, and RTECS publishes data for one or more components.

RTECS Mutagenic

The components of this material have been reviewed, and RTECS publishes data for one or more components.

RTECS Reproductive Effects

The components of this material have been reviewed, and RTECS publishes data for one or more components.
Safety Data Sheet  
Material Name: CREOSOTE PRESSURE TREATED WOOD  
SDS ID: 00228327

respiratory system, skin, eyes, immune system (sensitizer)

Target Organs (Components)  
WOOD DUST, HARDWOODS (Not Available)  
immune system (sensitizer)
WOOD DUST, SOFTWOODS (Not Available)  
immune system (sensitizer)

Medical Conditions Aggravated by Exposure Based on Product and Component Information  
respiratory disorders, skin disorders and allergies

Additional Information (Product)  
This product contains coal tar creosote. Volume 35 of the IARC monograph states that there is limited evidence that coal tar derived creosotes are carcinogenic in humans and sufficient evidence for the carcinogenicity of creosote in experimental animals. Limitations in the human exposure studies reviewed by IARC (including the presence of other chemicals, small study populations and not well documented exposure levels) contributed to IARC’s conclusions regarding human exposure to creosote. When applied to the skin of mice in experimental studies, creosote produced skin tumors and in one study produced lung tumors.

Most available information on the effects of coal tar creosote in humans comes from older occupational studies in the wood-preserving and construction industries. Today, with the use of engineering controls and personal protective equipment, occupational exposure to creosote components is expected to be below permissible exposure limits (measured as CTPVs). Wood dust is particles of varying size produced from processing or handling wood. Cancer of the nasal cavities and sinuses is associated with exposure to hardwood dust. IARC concluded that there were too few studies to evaluate cancer risks attributable to exposure to softwood alone and to any particular species of wood. In view of the overall lack of consistent findings, IARC also concluded that there is no indication that occupational exposure to wood dust has a causal role in cancers of the throat, lung, lymphatic and blood systems, stomach, colon or rectum.

Different woods produce different health effects and there is evidence that wood from different trees of the same species can produce varying health effects. Woods other than Western Red Cedar (WRC) seem unlikely to be responsible for large numbers of cases of respiratory allergies. Other common wood dusts produce asthma/pulmonary effects that are less well described than the responses to WRC. These other wood species (e.g., oak and pine) are considered somewhat allergenic.

*** Section 12 - ECOLOGICAL INFORMATION ***

Component Analysis - Aquatic Toxicity  
COAL TAR CREOSOTE (8001-58-9)

Fish:  96 Hr LC50 Brachydanio rerio: 2.6 - 6.6 mg/L [static]; 96 Hr LC50 Oncorhynchus mykiss: 0.57 mg/L [static]

Invertebrate:  48 Hr EC50 Daphnia magna: 1.04 mg/L; 48 Hr EC50 Daphnia magna: 0.065 - 0.082 mg/L [Static]
**Section 13 - DISPOSAL CONSIDERATIONS**

Disposal Methods
Dispose in accordance with all applicable regulations. Treated wood should not be burned in open fires or in stoves, fireplaces or residential boilers, because toxic chemicals may be produced as part of the smoke and ashes. Treated wood from commercial or industrial use (e.g., construction sites) may be burned only in commercial or industrial incinerators or boilers in accordance with state and federal regulations. For more information please see Koppers Consumer Information Sheet for this product.

End of Sheet 00228327
CREOSOTE PRESSURE-TREATED WOOD CONSUMER INFORMATION SHEET

CONSUMER INFORMATION *

This wood has been preserved by pressure treatment with a U. S. Environmental Protection Agency (EPA)-registered anti-microbial pesticide product containing creosote. Creosote pressure-treated wood provides protection against attack by fungi, insects, and marine borers.

Creosote remains in the pressure-treated wood for a long time. Prolonged or repeated exposure to creosote may present certain hazards. Therefore, the following precautions should be taken both when handling creosote-treated wood and determining where to use it.

This Consumer Information Sheet is not meant to replace the Material Safety Data Sheet (MSDS) for creosote pressure-treated wood. The MSDS must be read and understood before handling creosote pressure-treated Wood

Use Site Precautions for Creosote-Treated Wood

Creosote-treated wood commodities must only be used for those applications included in the American Wood Protection Association (AWPA) use category standards as set forth in the most current edition of the AWPA Book of Standards. For more information, contact the treater and/or the AWPA.

Creosote-treated wood is for exterior/outdoor uses only.

Creosote-treated wood should not be used where it will be in frequent or prolonged contact with skin.

Do not use creosote-treated wood for farrowing or brooding facilities.

Do not use creosote-treated wood when the preservative may become a component of animal feed, such as structures used for storing silage food for cattle.

Do not use creosote-treated wood where there may be direct contact with domestic animals or livestock which may crib (bite) or lick the wood.

Do not use creosote-treated wood for cutting boards, countertops, and construction materials for beehives.

Do not use creosote-treated wood where it may come in direct or indirect contact with public drinking water for human and domestic animals or livestock, except for uses involving incidental contact such as docks and bridges.

Although generally not recommended, if creosote-treated wood is to be coated or sealed, the wood must be clean and dry before applying the coating material. The only recommended coatings are a water-based pigmented emulsion and alcohol-based shellac products.

Consumer Handling Precautions for Creosote-Treated Wood

Dispose of creosote-treated wood by ordinary trash collection services. Creosote-treated wood should not be burned in open fires or in stoves, fireplaces, or residential boilers. Creosote treated wood may be burned only in commercial or industrial incinerators or boilers in accordance with Federal and State regulations.

Avoid frequent or prolonged inhalation of sawdust from creosote-treated wood. When sawing and machining (includes, but not limited to drilling and adz cutting) the wood, wear a dust mask. Whenever possible these machining operations should be performed outdoors to avoid indoor accumulation of airborne sawdust from the creosote-treated wood. When power-sawing and machining, wear goggles to protect eyes from flying particles.

Avoid frequent or prolonged skin with creosote-treated wood. When handling the treated wood, wear long-sleeved shirts and long pants and use gloves rated as chemical resistant by the manufacturer.

After working with creosote-treated wood, and before eating, drinking and use of tobacco products, wash exposed areas thoroughly.

If oily preservative or sawdust accumulates on clothes, launder before reuse. Wash work clothes separately from other household clothing.

* This Consumer Information Sheet is being distributed with creosote pressure-treated wood as part of the wood treating industry’s voluntary consumer awareness program, which EPA approved in 1986. Since that time, EPA has completed a comprehensive reregistration review of creosote, creosote registrants have voluntarily eliminated all non-pressure treatment uses of creosote, and certain American Wood Protection Association standards have changed (for example, the elimination of creosote-treated wood block flooring). This updated Consumer Information Sheet reflects these developments.
