

WEYERHAEUSER GREEN STUDS

BUILDERS ARE GOING GREEN. OUR STUDS ARE HELPING THEM GET THERE.

Going green just got a lot easier. Weyerhaeuser's newest lumber product delivers a whole new level of quality along with the features green homebuilders—and homebuyers—are looking for. And there's no need to reinvent the wheel. It's a matter of one simple step—use Weyerhaeuser Green Studs.

WEYERHAEUSER GREEN STUDS ARE IDEAL FOR GREEN BUILDING

Certified to the Sustainable Forestry Initiative[®] (SFI) standard, so you know our product comes from responsible sources. The proof is stamped on every stud.

Green Approved by the National Association of Home Builders (NAHB) Research Center for use in the National Green Building Standard™—making it easier to build green with Weyerhaeuser.

Made in Oregon from green (naturally dried) Douglas Fir and could qualify for the regional materials credit in green building programs.

WEYERHAEUSER GREEN STUDS DELIVER THE QUALITY YOU DEPEND ON

Superior in Appearance thanks to our proprietary grade rule. Premium and #1 pieces are included in every package.

#2 & Better Grading means that our studs are graded to higher design values than standard & better or stud grade.

A Mold Inhibitor is applied to the entire stud, including both ends, to give builders peace of mind during framing.

Straight. Our advanced manufacturing technology produces a straighter stud with a low percentage of heart center.

Conveniently Available mill direct or in market through a single point of contact.

WEYERHAEUSER GREEN STUDS

WEYERHAEUSER – LEADING THE WAY FOR OVER A HUNDRED YEARS

Building green is a matter of making smart choices—for your business, for your customers, and for the planet. By choosing Weyerhaeuser, you know you're choosing a company whose commitment to sustainability stretches all the way from responsible forest management to reducing CO₂ emissions.

We're minimizing our environmental footprint by producing products that are:

RENEWABLE AND RESOURCE-EFFICIENT

- Wood from responsibly managed forests is nature's most renewable building material. We plant more than 100 million seedlings every year to ensure the availability of forests for future generations.
- We use virtually every part of every tree in the production of our products or to generate energy at our mills.

RESPONSIBLY HARVESTED AND CERTIFIED FOR SUSTAINABILITY

- Each year, we harvest only 1-3% of our timberlands.
- Our U.S. forests and mills are certified to the Sustainable Forestry Initiative® (SFI) standard.

CARBON NEGATIVE

- From live trees to finished framing materials, our products absorb and store more CO₂ than is generated in their production.

Weyerhaeuser Green Studs are designed to integrate seamlessly with all of Weyerhaeuser's random length lumber, iLevel's engineered wood products, and our complete line of complementary structural framing solutions for every application.
