

FINE TUNE YOUR FLOOR

TJ-PRO™ RATING SYSTEM: THE BALANCE BETWEEN PREDICTABLE FLOOR PERFORMANCE AND COST

Builders and framing contractors want predictable costs and no callbacks. Homeowners want floors that meet their expectations. The TJ-Pro Rating System from iLevel combines extensive real-world research with an integrated system of proven engineered framing components to enable you to meet or exceed those expectations.

TJ-Pro Rating will help achieve your desired floor performance:

25 < COST SAVINGS **45** PERFORMANCE > **65**

HOW IT WORKS

The TJ-Pro™ Rating System **takes the guesswork out** of achieving an ideal balance between performance and cost. The system automatically calculates everything from joist depth, span, and spacing to the type and thickness of the subfloor to determine required materials and help **maintain the budget**.

First, consider unique variables, opportunities, and goals that affect performance and cost:

< SHALLOWER	TJI® JOIST DEPTH	DEEPER >
< LONGER	TJI JOIST SPAN	SHORTER >
< WIDER	TJI JOIST SPACING	NARROWER >
< THINNER	SUBFLOOR THICKNESS	THICKER >
< LOWER	CUSTOMER EXPECTATION	HIGHER >
25	< COST SAVINGS	45
	PERFORMANCE	> 65

**ONLY
WITH
iLEVEL**

The following will also affect your floor performance, but only iLevel can tell you how:

Glue and nail attachment | Ceiling type and thickness | Bridging and blocking
Perpendicular walls | Poured overlays

Floors that use the TJ-Pro Rating system can meet or exceed your buyer's expectations and **actually cost less** than what you've been building. That's because TJ-Pro Rating optimizes every TJI® joist and panel from the iLevel floor framing catalog to balance the **desired performance** with the most **efficient use of material**.

Once you find that balance of performance and cost, the TJ-Pro Rating System can be applied to all of your house plans to **ensure predictable results** every time. Or, you can adjust component specs to move the rating needle up or down to deliver **better performance** or **cost-efficiency**... whatever the situation or the customer calls for.

**TJ-Pro Rating is featured in:
Javelin® | Comparis® | Forte™**
