# INTRODUCING NEXTPHASE® SITE SOLUTIONS AND JOBPACK

FROM iLEVEL BY WEYERHAEUSER

**High-quality framing products and technical resources available from your local dealer and the industry's leading supplier of structural building materials.**

What's it worth to shave a few days off the schedule? What's the cost of a callback? If you know these values, then you know how critical it is to have the right framing materials on the job when you need them, ready to assemble. That's where **NextPhase® Site Solutions** from iLevel by Weyerhaeuser come in. By integrating a broad range of proven, high-quality products from Trus Joist, Strukturwood, and Weyerhaeuser, iLevel® NextPhase® Site Solutions offer building material dealers and fabricators proprietary design and fabrication software tools compatible with industry-leading specialized saws, material handling, and component fabrication equipment. Your participating dealer can now deliver cost-efficient, structurally superior floor framing layouts and takeoffs that are ready to load, deliver, and install on schedule.

How? By starting with JobPack precision cutting services. JobPack starts you down the road of faster installation, better product performance, and safer job sites. Through your trusted local building materials supplier, NextPhase® JobPack® services can deliver accurate and on-time floor framing packages that can boost your bottom line. Your crews and trade partners are ready to work as soon as the materials arrive on site, and can assemble the pieces quickly, safely, and accurately from clear, comprehensive framing plans and instructions. NextPhase® Site Solutions make it easy, and only an iLevel supplier has them.

# NEXTPHASE® JOBPACK

BETTER FRAMING BY DESIGN

In conjunction with your iLevel dealer, NextPhase® Site Solutions guide you and your crews through a progression of framing accuracy, timing, performance, and value. Consider the wealth of features and benefits, including:

**JobPack Provides:**

Readily available, superior-quality floor joists, beams, panels, and accessories.

**Your Benefit:**

An integrated structural floor system ready to deliver on time to the job site.

**JobPack Provides:**

Detailed floor framing layouts and bundled products to your specification.

**Your Benefit:**

The ability to stage materials on the job site for faster assembly.

**JobPack Provides:**

All materials are identified by label and are marked for blocking, connectors, mechanical rough-ins, and intersecting members.

**Your Benefit:**

Instant reference from the placement plans for fast and accurate assembly that reduces cycle time and labor costs.

**JobPack Provides:**

Materials accurately pre-cut to length.

**Your Benefit:**

Minimize field measuring and trimming—products drop into place for faster, safer installation.

**JobPack Provides:**

Framing members pre-drilled for mechanical rough-ins.

**Your Benefit:**

Fewer mis-cuts, damaged materials, and delays, reducing hard costs.

**Consider the value of framing faster and better, delivering more houses in less time with confidence and consistency. Now you're ready for NextPhase® Site Solutions.**

# JOBPACK

THE WAY YOU FRAME TODAY—ONLY BETTER

Working with JobPack, these NextPhase® Site Solutions streamline your standard framing routine. Your drawings are converted quickly and accurately into floor framing layouts that take your preferred materials and framing practices into account while making the best use of the entire inventory of iLevel products. In turn, material lists associated with the layouts are transformed into fabrication instructions that direct the cutting, bundling, and loading of framing materials for delivery, enabling you to stage them on site and direct framing crews with more confidence and precision than ever before. Mechanical trades, meanwhile, can work side by side instead of in progression, knowing that their rough-ins won't conflict.

To further enhance production efficiency and safety, JobPack includes job site training programs for superintendents, in-house crews, and subcontractors, and the support of trained and knowledgeable field representatives. Available exclusively at your iLevel dealer's disposal, these resources enable the delivery of much more than just the sticks and panels of a floor framing package. With JobPack, you gain the confidence of a better-built house now and long after the owners have moved in.

# MAKE THE CALL

WITH JOBPACK, YOU'RE ON THE WAY TO A HIGHER LEVEL OF FRAMING

JobPack is the first and most important step in transforming your framing processes into a simpler, more cost-efficient routine that helps improve cycle time, structural consistency, and overall profitability.
