iLevel by Weyerhaeuser Now Distributing Specialty Selex Radiata Pine Plywood and Beaded Paneling

High-Grade, Smooth Product Ideal for Underlayment, Furniture, Paneling and Interior Finishes

FEDERAL WAY, Wash., June 17, 2010 – iLevel by Weyerhaeuser, the leader in the structural frame products, software and services market, is now partnering with CMPC to distribute Selex Radiata Pine plywood and beaded paneling across the United States. The distribution partnership enhances iLevel's expansive range of wood product offerings and helps meet the specific needs of builders for specialty furniture, underlayment and decorative wood finishes. iLevel will be the largest distributor of Selex Radiata Pine plywood in the country, offering the product through traditional lumber and building material dealers, as well as specialty wood product distributors. www.iLevel.com, www.selexcmpc.com/usa.html

Selex Radiata Pine plywood is sanded to a fine, smooth finish. The A-grade faces of the panels have an outstanding appearance free of knots and holes, while the C-grade faces have only minimal natural defects (not greater than 40 mm wide). Their exceptional appearance makes the

panels suitable for decorative sheathing, furniture, underlayment, paneling, wainscoting, flooring and laminating. Selex Radiata Pine plywood is also lightweight and easy to handle.

“We pride ourselves on delivering the best wood products to our customers from brands they trust,” says Sue Snuggs, Strategic Product Manager for iLevel by Weyerhaeuser. “Selex Radiata Pine plywood is a very high quality finishing product; it has an outstanding appearance and is essentially free of defects. It’s a great complement to our existing range of specialty building materials.”

“iLevel is a natural fit for a new distribution partnership,” adds Daniel de Witt, General Manager for CMPC. “They know the building industry inside and out. We’re excited to be working with a company that is recognized as such a reliable resource.”

All Selex plywood is manufactured from Radiata Pine and grown on managed plantations that are third-party certified for sustainability to the internationally recognized Programme for the Endorsement of Forest Certification (PEFC) standard.

Distribution of Selex Radiata Pine plywood and beaded paneling continues iLevel’s support of green building goals. The company has achieved 100 percent certification of its lumber and engineered wood products to the Sustainable Forestry Initiative (SFI®) standard, designation of its products as Green Approved by the National Association of Home Builders (NAHB) Resource Center, and received product listings under the ICC-ES® Sustainable Attributes Verification and Evaluation™ (SAVE™) Program.

About iLevel by Weyerhaeuser

iLevel is Weyerhaeuser’s integrated residential, multi-family and light construction framing business providing seamless, unified building solutions. By offering the most comprehensive and innovative collection of proven structural framing materials, technical support and software in the building industry, and the means to distribute them efficiently, iLevel is leading the structural frame market and helping builders and dealers succeed in today’s challenging business environment. www.ilevel.com.

About Weyerhaeuser

Weyerhaeuser Company, one of the world's largest forest products companies, began operations in 1900. We grow and harvest trees, build homes and make a range of forest products essential to everyday lives. We manage 22 million acres of timberland worldwide on a sustainable basis in compliance with internationally recognized forestry standards. At the end of 2009, we employed approximately 14,900 employees in 10 countries. We have customers worldwide and generated \$5.5 billion in sales in 2009. Our stock trades on the New York Stock exchange under the symbol WY. Additional information about us is available at <http://www.weyerhaeuser.com>.
