iLevel Stamping its Wood Products with SFI Certified Fiber Sourcing Label

Labels on Individual Framing Members Provide Greater Visibility that Products Come from Responsible Sources

Federal Way, Wash., December 6, 2010 – iLevel by Weyerhaeuser will soon provide builders and dealers with an easy way to recognize that all of its manufacturing facilities are certified to the SFI Certified Fiber Sourcing standard. In addition to a plan to include an SFI Certified Fiber Sourcing logo on product wrap, the company will be stamping the logo on each lumber and engineered wood product piece by the end of January. Builders can quickly spot these products in lumberyards and visibly demonstrate during construction their commitment to using responsible materials. www.ilevel.com

The SFI Certified Fiber Sourcing Standard indicates that iLevel knows where all of its wood comes from. iLevel includes the following factors in its own forests, as well as those of its suppliers:

- Required use of best management practices to protect water quality
- Required use of qualified logging professionals
- Avoidance of controversial sources
- Outreach to family forest owners on how to manage their forests sustainably
- Support for research to improve sustainable forestry

“The SFI program values the crucial role all forest landowners play in protecting the long-term health and sustainability of our forests, including the millions of family forest owners in North America who supply wood fiber to SFI program participants,” said SFI President and CEO Kathy Abusow.

“As green building becomes the norm, our customers want to know that the wood products they’re investing in are grown and harvested to high standards,” added Carlos Guilherme, Vice President of Sales and Marketing for iLevel. “The label on iLevel product wrap shows the bundle meets the SFI Certified Fiber Sourcing Standard, and labeling individual pieces further reinforces this certification, even after the bundle is separated.”

iLevel products with the SFI Certified Fiber Sourcing Standard label include those meeting SFI requirements for either primary or secondary producers. Products meeting the primary producer requirements include softwood dimension lumber such as iLevel Framers Series™ lumber, iLevel Pro Series™ lumber, iLevel Premium Joists™ and Weyerhaeuser Green Studs. iLevel engineered wood products meeting the secondary producer requirements include TJI® joists, TimberStrand® LSL, Parallam® PSL, Microllam® LVL, and iLevel® Edge™ and Edge Gold™ panels.

About iLevel by Weyerhaeuser

iLevel by Weyerhaeuser provides the building industry’s most comprehensive and innovative collection of structural framing products, technical support and software for homes, multi-family and light construction. It is a leader in developing ways to help builders and dealers improve quality, reduce costs and streamline construction. iLevel’s Trus Joist® brand celebrates 50 years of engineered wood product innovation, building on a legacy started in 1960. All of the engineered wood products and specialty dimension lumber iLevel manufactures are SFI® certified. In addition to its own products, iLevel also distributes a range of third-party construction and finishing materials.

About Weyerhaeuser

Weyerhaeuser Company, one of the world’s largest forest products companies, began operations in 1900. We grow and harvest trees, build homes and make a range of forest products essential to everyday lives. We manage our timberland on a sustainable basis in compliance with internationally recognized forestry standards. At the end of 2009, we employed approximately 14,900 employees in 10 countries. We have customers worldwide and generated \$5.5 billion in sales in 2009. Our stock trades on the New York

Stock exchange under the symbol WY. Additional information about us is available at <http://www.weyerhaeuser.com>.

About SFI, Inc.

SFI, Inc., is an independent 501(c)(3) non-profit charitable organization, and is solely responsible for maintaining, overseeing and improving the internationally recognized Sustainable Forestry Initiative (SFI) program (www.sfiprogram.org). Across North America, more than 175 million acres are certified to the SFI forest management standard, making it the largest single standard in the world. The SFI program's unique fiber sourcing requirements promote responsible forest management on all suppliers' lands. SFI, Inc., is governed by a three-chamber board of directors representing environmental, social and economic sectors equally.
