iLevel® TJI® 560D Series I-Joists Offer Greater Depth

New Wood I-Joist Suitable for Single-Layer Fire Separations in Residential, Multi-Family and Light Commercial Projects

FEDERAL WAY, Wash., July 13, 2010 – Expanding builders’ options for wood I-joists in floors and roofs, iLevel by Weyerhaeuser adds the TJI® 560D series to its popular TJI-joist lineup. The upgraded joist features greater depths (up to 24 inches) and is suitable for use in one-hour, single-layer fire separations and for heavier-duty loads, such as those in multi-family structures and light commercial buildings. Using TJI 560D joists can help builders reduce overall material costs without compromising on fire safety or structural performance.

www.ilevel.com

As with all TJI joists, TJI 560D joists are lightweight, available in long lengths for greater versatility in floor plans, and engineered for high dimensional stability to better resist warping, twisting and shrinking.

The new joist series is included in iLevel’s Javelin® structural frame design software and Forte™ single-member sizing software. Builders can use these software tools to quickly size and evaluate how the joist will work together with a complete package of framing materials before construction begins. TJI 560D joists can be directly substituted in projects designed with iLevel’s current 560 and 560T series TJI joists.

Manufacturing stamps printed on the joist flange and web help builders identify the TJI joist series, third-party certification and recognized code evaluation agencies. TJI 560D joists are included in iLevel's ICC ESR-1153 code report.

About iLevel by Weyerhaeuser

iLevel is Weyerhaeuser's integrated residential, multi-family and light construction framing business providing seamless, unified building solutions. By offering the most comprehensive and innovative collection of proven structural framing materials, technical support and software in the building industry, and the means to distribute them efficiently, iLevel is leading the structural frame market and helping builders and dealers succeed in today's challenging business environment. www.ilevel.com.

About Weyerhaeuser

Weyerhaeuser Company, one of the world's largest forest products companies, began operations in 1900. We grow and harvest trees, build homes and make a range of forest products essential to everyday lives. We manage our timberland on a sustainable basis in compliance with internationally recognized forestry standards. At the end of 2009, we employed approximately 14,900 employees in 10 countries. We have customers worldwide and generated \$5.5 billion in sales in 2009. Our stock trades on the New York Stock exchange under the symbol WY. Additional information about us is available at <http://www.weyerhaeuser.com>.
